ABOUT

Hi, I'm Paul! I'm a designer and marketer with over a decade of professional experience.

I've had a passion for all things computers and design from a young age. Over the years, I've utilized my skills in graphic and web design, as well as in branding, email marketing, social media, event marketing, UI/UX and app design, SEO, web analytics, paid advertising, video editing, podcasting, and AI for various industries, startups, universities, professional athletes, and many other small projects.

Some past work accomplishments I'm proud of include simultaneously launching a redesigned website and major trade show booth for HST Pathways, all while in the midst of multiple company acquisitions and having to unify branding and marketing materials. Many long hours paid off, with web traffic doubling, a 60% increase in organic search, and dramatic SEO improvements to 50+ key industry terms.

Most recently, I co-founded the employee incentive startup SocialCrowd with my best friend/college roommate. Our passion project has gone on to raise over \$4M in venture funding, and secure customers like the Milwaukee Bucks, Starbucks, Motorola, Sonic Drive-In, Panda Express, Shake Shack, and P.F. Chang's. It's been a challenging, but rewarding journey!

INTERESTS

Outside of work, I enjoy tennis and have previously competed in varsity and junior varsity teams. I'm also passionate about music, and have played guitar, piano, and violin. Other interests and hobbies include photography, travel, skiing, hiking, and all things space and science.
